#### **DETAILED ACTION**

Applicants' response, which included amendment to claims 1-22, filed on 11/09/2009, is made of record. Claims 1-22 are now pending. In view of applicants' response, all112 rejections and prior art 102 rejections over Peterson, Counsel, Chabrier and Yamaguchi have been obviated. However, the 102 rejection over Freeman is maintained and additional grounds of rejections are applied to currently pending claims.

## Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 16, 18 and 20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

- 1. Recitation of "at least one of" in claim 16 renders claim16 indefinite as it is not clear whether a mixture of compounds is claimed as composition or a single compound. Its replacement with "one or more" is suggested.
- 2. Recitation of "consists of" in claim 18 renders claim18 indefinite as it is not clear whether a mixture of compounds is claimed as composition or a single compound. Its replacement with " is selected from" is suggested.
- 3. Recitation of "is" in claim 20 renders claim 20 indefinite as it is not clear whether a mixture of compounds is claimed as composition or a single compound. Its replacement with "is selected from" is suggested.

# Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 4-15, 17, 19 and 21 are rejected under 35 U.S.C. 102(b) as being anticipated by Freeman et al., WO 98/55533.

Freeman teaches several phosphocholine analogs which include instant compounds. See page 3, formula I shown therein and note with the given definition of X and R<sup>1</sup>, compounds taught by Freeman include instant compounds. See Example 1 and Example 2 shown in pages 12-15.

This rejection is same as made in the previous office action. Applicants' traversal to over come this rejection is not persuasive. Applicants have argued that the carbocyclic ring A does not have CHO groups as in the cited reference. However, reference teaches several cyclohexenyl and cyclopentenyl compounds. The cyclohexenyl and cyclopentenyl compounds shown in pages 12-15 still anticipate instant claimed invention. See example 1 and example 2. Hence, this rejection is maintained.

Claims 1, 4-15, 17, 19 and 21 are rejected under 35 U.S.C. 102(b) as being anticipated by Fong et al., Lipids 12(10), 857-62, 1977; CA 88:17757, 1978(CAPLUS Abstract provided).

Fong teaches phosphocholine analog which include instant compound. See Compound shown in the CAPLUS Abstract.

### Allowable Subject Matter

Claims 3 and 22 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

### Conclusion

Any inquiry concerning this communication from the examiner should be addressed to Venkataraman Balasubramanian (Bala) whose telephone number is (571) 272-0662. The examiner can normally be reached on Monday through Thursday from 8.00 AM to 6.00 PM. The Supervisory Patent Examiner (SPE) of the art unit 1624 is James O. Wilson, whose telephone number is 571-272-0661. The fax phone number for the organization where this application or proceeding is assigned (571) 273-8300. Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (571) 272-1600.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAG. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-2 17-9197 (toll-free).
